RxAutoImage Pro 97 R14 Expert Graphics/Rasterex

Rasterex International of Norway and its North American distributor Expert Graphics have a long history in AutoCAD-based imaging applications. The old RxVectory program (still available, by the way) was one of the best in

AutoCAD users. Several products are available, starting at \$1,995; I reviewed the top-of-the-line RxAutoImage Pro 97.

Rasterex takes Release 14's built-in ability to load, display, and plot raster images and adds to it highly developed routines for image cleanup, object-based raster editing, and interactive or automatic raster-to-vector conversion.

RxAutoImage Pro installs from
